

Adobe Photoshop CC Introduction 2 Day Course

Overview

This course is centred on the manipulation of digital images through image preparation, image editing, and image creation. You will learn how to create a new image, crop, transform, retouch, paint, enhance, resize and add artistic touches. Selection methods and working with layers are also dealt with.

Audience

Anyone needing to use Photoshop to manipulate images or those wanting to know the basics with a view to using it with other applications such as InDesign.

Course Objectives

At the end of this course, delegates will be able to:

- ✓ Remove red eye, blemishes, scratches, etc. using retouching techniques
- ✓ Improve image colours and adjust contrast and brightness
- ✓ Create simple compositions by blending images together
- ✓ Add text and modify type settings in your designs
- ✓ Output artwork for web, print or video

Prerequisites

No prior knowledge of Photoshop is assumed.
