

Articulate Storyline 360 Introduction 2 Day Course

Overview

Articulate Storyline 360 is used to create rapid eLearning that is interactive and immersive. The course covers the user interface and simple yet powerful productivity features and will give you the skills needed to create engaging interactive eLearning content for the web and mobile devices. Plenty of hands-on exercises ensure practical experience with the tools and options. Along the way topics like quizzes, software simulations and multimedia are all covered. Everything you need to create professional eLearning modules for training and assessment.

Audience

eLearning content designers, instructional designers, trainers and marketing professionals.
